

FIELDNET® | WIRELESS IRRIGATION MANAGEMENT

If it's remotely possible, FieldNET® can do it.

- Manage pivots & laterals
- Manage pumps
- Integrate plug & play sensors

Stay informed and make adjustments on the fly with next-generation FieldNET. Providing the most comprehensive options to remotely control entire irrigation systems – from pivots and laterals to pumps and sensors – FieldNET by Lindsay is the industry's leading intuitive wireless management system. That means that at any time throughout the crop lifecycle, growers can see what their systems are doing and control them from virtually anywhere using a laptop, tablet or smartphone.

Fast and user-friendly, FieldNET provides an integrated water, fertilizer, and chemigation solution with remote control of pivots, laterals, end guns, injectors and pumps, and the ability to monitor and record everything from water and energy usage to rainfall and temperature. It all adds up to less time in the field, less spent on valuable resources, and greater control of your operations.

FieldNET mobile apps work with iPhone®, iPad® and Android™ platforms so you can check systems from virtually anywhere.

Everything in one powerful application

- Control pivots, laterals, end guns, injectors and pumps
- Monitor and record water usage, energy usage, tank or pond levels
- Expand capabilities with plug & play add-ons
- Keep up-to-date with real-time alerts
- Monitor weather information such as temperature, rainfall, humidity and wind speed
- Manage groups of equipment and people
- Run reports

NAVIGATION BAR

QUICK TRAY

Patent-pending, slide-out control appears on demand to easily manage functions without ever leaving the map view.

EQUIPMENT Search equipment or predefined groups of equipment

ALERTS Stay informed with text message and email alerts to notify you right when things happen

REPORTS Run customized or templated reports to monitor performance and meet compliance requirements

CONTROL CENTRAL

Real-time comprehensive **system dashboard** provides an overview of your entire irrigation operation. The map view organizes your equipment to provide quick at-a-glance status.

STATUS ICONS

Graphical status indicator shows where your equipment started, where it currently is, what it's doing and where it's going – whether it's for pivots or laterals.

Patent-pending status icons overlay a GPS-assisted map of your operations to help you identify and prioritize any equipment that needs attention.

CONTROLS, ALERTS AND REPORTS

PIVOTS AND LATERALS

Full detail, access, and control of pivot and lateral performance for operational planning.

PUMP CONTROL

View pressure and flow status of pumps.

ALERTS AND REPORTING

Text message or email alerts delivered based on predefined criteria. Run water or energy use reports to monitor performance.

FieldNET Mobile

Convenient control and monitoring – in the palm of your hand

FieldNET Mobile apps for major smartphones and tablets combine the benefits and timesaving innovation of FieldNET with the convenience of Web-enabled tablets.

FieldNET Mobile gives you what you need in real time

Featuring an easy-to-use interface, FieldNET Mobile allows users to monitor and control irrigation equipment from virtually anywhere.

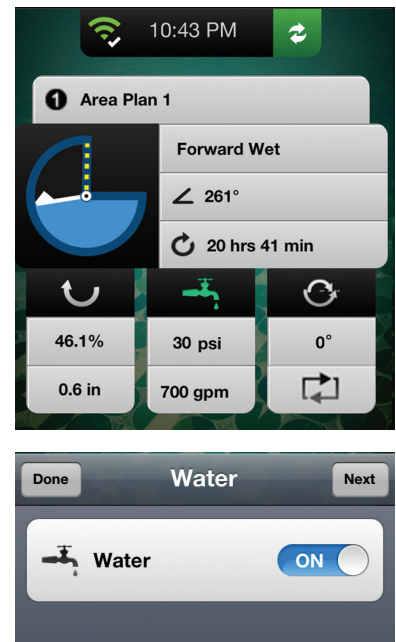

Get a comprehensive view

When you want to make sure your pivot is reaching every part of your field, count on FieldNET

giving you an in-depth view of individual pivots. Not only can you track your pivots, but you can adjust them accordingly, wherever you are or whatever type of pivots you use.

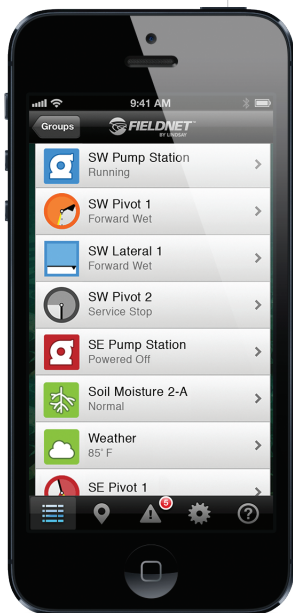

Start saving

Experience the convenience of FieldNET. Fewer trips to the field means using less fuel and labor.

Quick and easy control with detailed dashboard and wizard functionality guiding users through the selection option

FieldNET Mobile's user-friendly interface provides full remote access from your smartphone or tablet.

BENEFITS OF FIELDNET MOBILE

- Save money with fewer trips to the field
- User-friendly interface for fast remote access
- Receive real-time alerts, reducing the risk of unplanned downtime
- Know the status of all equipment immediately from one color-coded list
- Map view provides system insights and locations of equipment
- Quick link to full Web Portal features, such as end-guns and irrigation plans

Pump control

One integrated system maximizes performance

Remotely check on, receive real-time alerts and adjust pumps to meet the current demands of your field using a laptop, tablet or smartphone. Water, labor and energy costs are lowered through this one integrated control system. You can save up to 75% of the time and fuel it takes to manually check operations.

Monitoring and Control

Measurement and monitoring tools provide critical usage and performance information for continuous improvement.

Status and Alerts

Keeps growers informed on system operation and notifies them about any disparities in normal operation.

Pressure Adjustments

FieldNET can automatically adjust pump station pressure set points to best match demand from the pivots that are irrigating.

Dynamic Demand Control (DDC)

Allows pivots to be grouped with pump stations for powerful information-sharing which reduces energy costs. Pumps are operated at the most energy-efficient setpoint and then automatically sequence to effectively meet demand.

FEATURES OF PUMP CONTROL

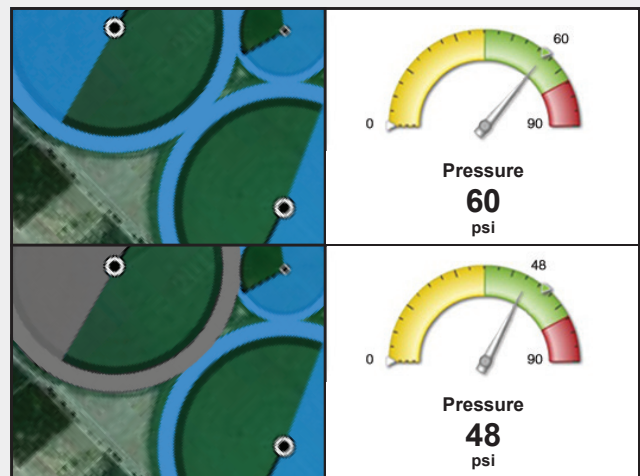

- Graphically display key sensor inputs
- Compare current demand and actual flow for disparity alerts
- Monitor pump hours, status and capacity
- Track volume pumped
- Total water and energy log
- Manage alerts

Zero in on a specific pump in the Quick Tray to see current status or to make changes.

DYNAMIC DEMAND CONTROL (DDC)

Three pivots are running, one pivot requires an increased pressure of 60 psi. When that pivot is turned off, the other pivots only require 48 psi. FieldNET and DDC automatically adjust the pump station to meet the reduced pressure demand, resulting in energy savings.

ENHANCE YOUR MANAGEMENT WITH PLUG-AND-PLAY ADD-ONS

Growsmart® by Lindsay plug-and-play add-ons enhance the power of FieldNET so you can monitor and record soil water conditions and use, along with weather station information such as temperature, wind speed, rainfall, humidity and more.

These innovative add-ons help utilize best management practices to offer convenience and lower operating costs through the efficient use of time, labor, energy and water.

SOIL MOISTURE MONITOR

Continuous monitoring can help you make informed decisions to ensure irrigation is applied in the right amount, at the right time.

The soil moisture monitor:

- Minimizes water stress to plants
- Maximizes potential yield
- Reduces operation costs

Individual probes and sites can be named for quick reference, and linked to the associated pivot field. Soil water trends are illustrated in easy-to-read charts, and are archived for historical purposes.

Probe can be installed at multiple depths to track the water in the full root zone.

WEATHER STATION

Your field has its own unique micro-climate. This professional-grade weatherproof unit features sensors for:

- Wind speed & direction
- Solar radiation
- Air temperature (minimum, maximum and average)
- Relative humidity
- Precipitation
- Calculated ET (based on grass crop)

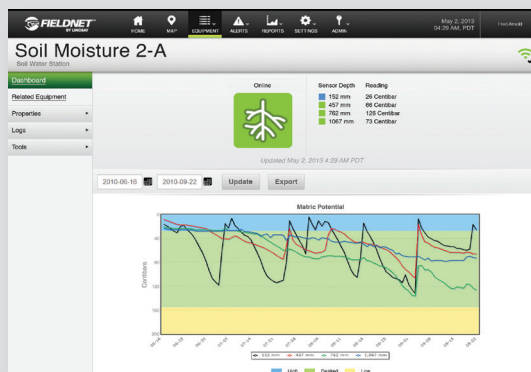

Historical records are maintained for quick access, with trending charts together on one page.

Weather station with solar panel, battery, and charging circuit.

Enhance with FieldNET

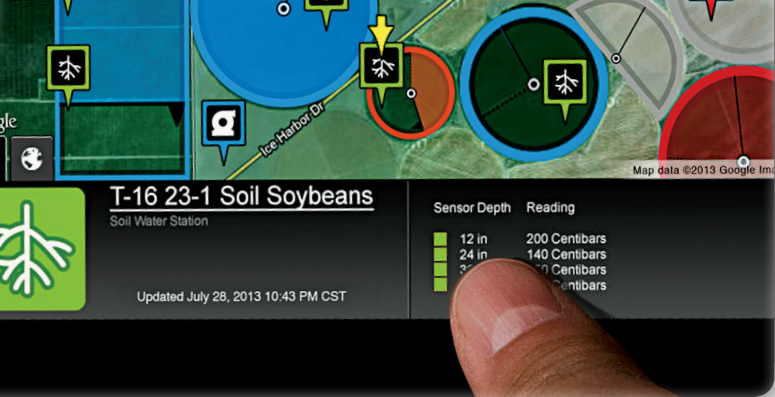

Increase your management capabilities with FieldNET for real time status, alerts and reporting.

Soil Moisture

Weather

Status Icons and Alerts

Easy-to-use icons and configurable alerts keep you informed

FLOW METER

Water management and conservation is an ever-increasing concern for growers. The magnetic flow meter takes the guesswork out of water usage while saving time, water, energy and money.

- Superior IP68 enclosure seal
- No moving parts to replace
- No flow obstruction
- Range of sizes
- Minimal straight pipe run required
- Remote management capabilities with FieldNET
- Optional battery pack featuring longer life than most competitive models

International Center for Water Technology (ICWT) is an independent testing laboratory dedicated to advancing water management practices and irrigation technology.

FIELDNET PRO WITH GPS

FieldNET PRO combines GPS positioning and wireless communication to enhance the efficiency and effectiveness of your existing center pivots*. By retrofitting an existing system with FieldNET PRO, you gain all of the convenience of FieldNET's Web and mobile app capabilities. And global positioning gives you control right down to the end guns for precise water application.

*Works with non-Zimmatic mechanical and programmable control panels

CUSTOM PUMPING SOLUTIONS

The Lindsay Advantage

Lindsay is the only single-source irrigation manufacturer that can develop a customized pivot, lateral or drip system for your individual needs. From planning and design to wireless management, filtration and custom pump stations, Lindsay will help you optimize yields and reduce risk while efficiently utilizing resources.

Growers around the world rely on Lindsay's innovative technology and long-lasting products supported by a network of knowledgeable dealers.

For more information on how FieldNET® can help you monitor and control your pivots, talk to your Zimmatic by Lindsay dealer today – or visit www.myfieldnet.com for a video demo.
